

ARCHIVES

Our President, [Hilliard Cox](#), has long been a respected expert in the fields of metrology, calibration and precision instruments. We have recently persuaded Hill to write a regular newsletter, ***Metrology Insider's Notes***, which provides practical advice and tips.

Click on the links below to view or download the indicated publication:

- [Metrology Insider's Notes – Number 1](#) – *Sorting Out Gauge Tolerances*
- [Metrology Insider's Notes – Number 2](#) – *Calibration Basics: The what's it ...? and other rules.*
- [Metrology Insider's Notes – Number 3](#) – *Unrealistic Gauge Tolerances*
- [Metrology Insider's Notes – Number 4](#) – *Calibrating Outside Micrometers*
- [Metrology Insider's Notes – Number 5](#) – *Checking Tighter Tolerances*
- [Metrology Insider's Notes – Number 6](#) – *Why Special Thread Rings Cost So Much*
- [Metrology Insider's Notes – Number 7](#) – *Calibrating Calipers*
- [Metrology Insider's Notes – Number 8](#) – *What You Should Know About Pin Gauge Sets*
- [Metrology Insider's Notes – Number 9](#) – *Specifying Thread Gauges Correctly*
- [Metrology Insider's Notes – Number 10](#) – *Forcing Gauges*
- [Metrology Insider's Notes – Number 11](#) – *Measurement Uncertainty*
- [Metrology Insider's Notes – Number 12](#) – *Picking the Right Instrument for the Job*
- [Metrology Insider's Notes – Number 13](#) – *Calibration Scams*
- [Metrology Insider's Notes – Number 14](#) – *\$10 Calibration Reports*
- [Metrology Insider's Notes – Number 15](#) – *Getting the Most Out of Your Gauge Blocks*
- [Metrology Insider's Notes – Number 16](#) – *Panic Stations – Preparing for a Quality Audit*
- [Metrology Insider's Notes – Number 17](#) – *Calibration Record Retention*
